

**Position:** Senior Consultant

**Location:** The Woodlands, Texas

**Responsibilities:** Delivery of software test services and consultancy to TTC clients. Help TTC to grow our offerings. Mentoring, advising, and delivering to clients' best testing practices utilizing TTC's testing models. Assess customer's manual and automated testing needs. Maintain a hands-on involvement in test execution, test automation and risk coverage analysis. Review functional and non-functional requirements and specifications. Produce test artifacts such as Test Strategy, Test Plan, Test Cases and Test Metrics reports. Build and support automated testing frameworks based on various technologies. Build and support custom add-ons and extension for off the shelf test automation tools. Deliver good quality work internally and at a customer site and meeting project deadlines. Maintain excellent relationships with key customer stakeholders managing their expectations. Actively participate in project team meetings to offer insight on application issues discovered and present solutions to resolve, meet requirements and ensure desired quality. Mentoring junior personnel assigned to the teams on methods, strategies, frameworks, and other technical aspects.

**Qualifications:** This position requires a bachelor's degree (or foreign equivalent) in computer science, engineering, or in a closely related field, plus 5 years of work experience in software development and/or quality assurance or in a closely related occupation. In the alternative, employer will accept a master's degree (or foreign equivalent) in computer science, engineering, or in a closely related field, plus 3 years of work experience in software development and/or quality assurance or in a closely related occupation.

**Special Requirements:**

1. Automated testing with at least one test automation tool and framework, such as Selenium, UFT, Tosca or Rational Robot
2. Technical expertise in programming, development tools and methodologies
3. Understanding of database concepts including database integrity and consistency
4. Working with SQL
5. Working with API testing (SOAP or REST)
6. Business requirements analysis and test case design using test case management tools including ALM, TFS, JIRA, and plug-ins; and
7. Ability to document defects and track them to resolution using defect management tools, including JIRA, Quality Center, and TFS.

Must possess expertise/knowledge sufficient to adequately perform the duties of the job being offered. Expertise/knowledge may be gained through employment experience or education. Such expertise/knowledge cannot be "quantified" by "time." \*Telecommuting Permitted\*.
